

## **Software Development Meeting Minutes**

**Company:** **Group 1**

**Project:** Java-Based Banking application

**Date:** January 07, 2026

**Time:** 11:30 AM - 1:00 PM

**Location:** Virtual Meeting

### **Attendees**

- Mobeen Raja
- Shashank Ravikumar
- Praveen Mathew
- Daniel Nkurunziza

### **Agenda**

1. UML diagram improvement
2. Implementation of code body
3. Database design

### **Topics covered**

- Implementation of code body: a group member shared their progress on creating a body, and on top of it, half of the session was spent on trying to create a CLI interface within comments to see the visual flow of the program, heavy discussion on the menu and the flow of the program, including clarity on the perspective of the program's view and purpose.
- GitHub: a group member shared their insights on GitHub functionality, teaching all other members how to branch, pull and merge, collaboratively sharing screens and walking through the process for each member; making sure the process is understood across the team, to prevent future merge issues.
- Database design: a group member shared their progress on the start of the design, with the customer table as the focused, further discussion was held on

what would be used a primary key and what would be used as a unique identifier for the customer.

**Next week's agenda:**

1. Further improvements to CLI interface and Menu creation
2. Further improvements on code body where applicable
3. Discussion of database design and its start

**Adjournment**

The meeting was adjourned at 1:00 PM.

**Next Meeting**
